👤 Profile

With over 3 years working in a high pressured health environment, I've developed an extremely resilient work ethic and approach problems with a solutions-focused mindset. My time in operating theatres has allowed me to gain strong teamwork and communication skills. Having recently completed a coding Bootcamp, I am now looking to combine these soft skills with my new technical skills and move into a full-stack developer role where I can continue to learn and grow. I am fast-paced and adaptable, and am excited to apply my skillset to the field of Tech.

🎓 Education

Full Stack Development, Le Wagon

July 2022 – December 2022 | London, United Kingdom

💼 Professional Experience

Part-Time Teaching Assistant, Le Wagon, London

January 2023 – present

- Teaching new Web Development students to instill a strong understanding of the fundamentals of programming in Ruby.

Queen's Lodge Support Living

July 2016 – May 2019 | Watford

- Led a team of 3 individuals on a daily basis, facilitating daily huddles to establish goals
- Provided assistance to patients with their daily dilemmas, with a focus on addressing mental health concerns
- Actively supported patients by coordinating appointments, filling out necessary forms, and advocating for their holistic well-being through effective communication
- Managed patients' medications, ensuring timely re-order and availability for patients
- Focused on achieving positive outcomes for patients through proactive and effective management of team and patient needs.

📁 Projects

SeakASneaker, Web App

October 2022 – November 2022

- Our first project at Le Wagon, this e-commerce platform allows users to purchase trainers.
- Working in a team
- we were able to complete the project within a tight deadline by utilizing our skills in Bootstrap, Ruby on Rails, HTML, CSS, Figma, Cloudinary, and Heroku.
- We implemented a database to store and manage data.
- Debugging

GimmeGolf, Web app 📄

November 2022 – December 2022

(gimmegolf.fun)

- GimmeGolf is a golf app with social features, developed as a final project at Le Wagon.
- The app allows users to book courses with friends or other members of the community, fostering connections among individuals with a shared interest in golf.
- As a team leader, I utilized tools learned at Le Wagon and my own personal management skills to oversee the development process.
- Debugging and troubleshooting.
- This project presented an opportunity to improve communication and teamwork skills.
